

Day 3

Sierra Leone

**PROMOTING AGRICULTURE
AND FOOD SECURITY: THE CONSTRUCTION
OF A VEGETABLE GARDEN AT ST. EDWARDS SCHOOL**

Finally Got in Contact

After not being able to get in contact with the Global Village team in Sierra Leone for almost three days the Mission Control Center (MCC) in Kapfenberg finally received first news from the team in Freetown. The MCC finally reached team leader Sheku Kamara on the mobile phone. He said the problem was that the only web server of the country broke down. The whole country was offline. Unfortunately the problem occurred from Monday morning, the opening day of the Action Week. "They fixed the problem this afternoon", said team leader Sheku Kamara, "The boys are doing a great job and are now looking forward to tell you all about it!" Starting from tomorrow there will be first pictures and reports of the project's efforts online...
