

Day 5

# South Africa

## SPORTS TOURNAMENT AND HIV/AIDS AWARENESS PROGRAMME

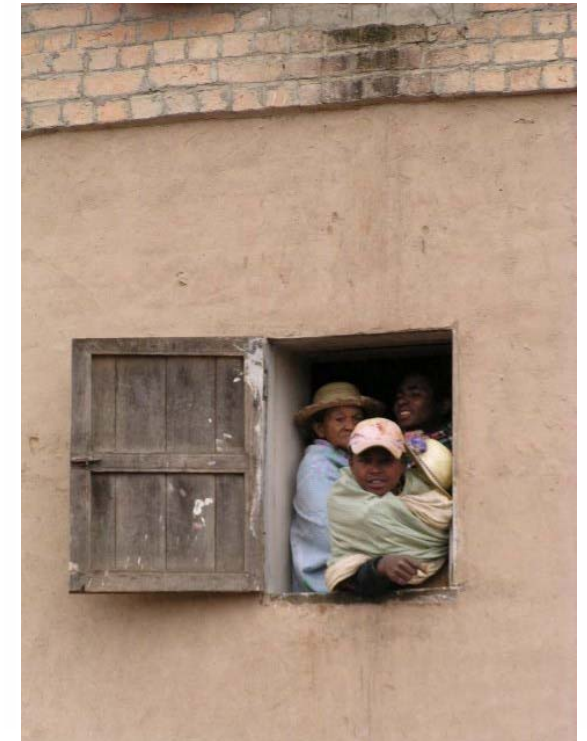

### MUSIC FESTIVAL TO UNITE CULTURES

South Africa is characterised by cultural diversity. This diversity is not only defined by the colour of the skin, there is a further ethnical, social and economical segregation.

The 5<sup>th</sup> day of the South African action week shall bring people with all these different backgrounds together.

We organised a local music festival in the

Mastec College of Polokwane, where we all kinds of ethnical influences will be represented. Not only western music like hip hop and R&B will be performed, we also want to present music rooted/ arisen in South Africa. Kwaito is probably the most popular example. It is a kind of slow house music with African influences. To get an idea of it, visit for acoustic examples:
