

Day 5.

Czech Republic

DESNA VALLEY

It was the second day of our work on the chapel.

The others were preparing some games for the children's day in the afternoon. When it finally came, it started to rain. It looked hopeless, but it stopped in a minute and changed to light showers. The rainbow appeared, too. It was really funny and also the children enjoyed it.

The evening was the most important for us. First of all we opened the exhibition with photos from India. The guests were majors of participating villages and the representatives of the municipality of the Olomouc region. Our Indian friends showed us the presentation about their country and its culture after that.

The very last part of the evening's program was the data-projection of some videos made by MCC and some from our own production.

OUR TEAM:
